OUR ARRANSAS CORRESPONDANCE. HELENA, Jan. 14, 189 Eds. Appeal: The question of lab absorbs all others. Everybody feels i magnitude, and appreciates its importance. We are not among those wh affect to deem it the modern Sphynx de fying all solution. There are some very

worthy persons almost upon the brink of "The crops should not be growed, "For the meadows all be moved;" who, here, upon the very threshold the experiment of free labor, and while It is yet in its very inception, are almost persuaded to believe it a failure. We nust accept things as they are and mould them to the best advantage of which they are capable. We must not permit free labor to be a failure. That should be our simple text. Idleness and vagrancy we must expect in a great many of the recently manumitted slaves, vic and crime we may expect of aimost all If it were otherwise it would be contrary to the natural course of events. A races suddenly lifted from the political non-ex-Istence of a state of slavery, and forced notens votens into the position of fre men, cast by the might of arms from the quiet contentment of a well esta lished system, where all their wants were supplied, and scarcely any other ment, we have no representation intellectual exercise required of them in Congress, Cabinet, or anywhere else, than that necessary to carry out the i we are aliens in our own Government and New Orleans.

The venerable is a very thick, "and parties in out he could not help doubting the housely of their purpose. All he had to say of a presonal nature concerning the criticisms and complaints of a certain not often became a grave."

We must expect bad faith, violation of contracts, idleness and crime to be the sum of the Sorthern people and press, to put their beel upon the neck of contracts, idleness and crime to be the sum of the Sorthern people and press, to put their beel upon the neck of contracts, idleness and crime to be the sum of the Sorthern people and mittee, reported favorably upon a bill relative to the establishment of a blar relative to the establishmen rule rather than the exception, among the liberated negroes. It would be very poor philosophy in us, to fold our arms and quietly look on, esterming as irremedial, these evils. Sambo is here, isoners, and we must make the best of him. He is the clephant which the Government has very growness in the less to find the Government has very growness in the less to find the Government has very growness in the less to find the Government has very growness in the less to find the Government has very growness in the less to find the Government has very growness in the less to find the Government has very growness in the less to find the Government has very growness in the less to find the Government has very growness in the less to find the Government has very growness to find the Government has very growness to find the little States atmy.
